Subject: California Regulations in Delaware

Hello, my name is Linda Shinn and I am a resident of Georgetown De. I am writing to complain about the the possibillity of these new regulations becoming law. In this economy none of us can afford these regulations. They are an extreme overreach of government. Government regulations are what has destroyed our economy and it has to stop. Also, arguing that global warming is the reason for this is just a little bit outrageous. Global warming does not exist. Scientifically proven. Please just stop. You and others like you are destroying our country.
